

Year 3 Individual Pupil Science Assessment Record

Name	Teacher	Class		
Pupil	Working Scientifically	Teacher		
I think I can...		Working towards	Achieved	Exceeded
	Ask relevant questions and using different types of scientific enquiries to answer them.			
	Set up simple practical enquiries, comparative and fair tests.			
	Make organised and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers.			
	Gather, record, classify and present data in a variety of ways to help in answering questions.			
	Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.			
	Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.			
	Use results to draw simple conclusions, make predictions for new values, suggest improvements and ask further questions.			
	Identify differences, similarities or changes related to simple scientific ideas and processes.			
	Use simple scientific evidence to answer questions or to support their findings.			
	Plants			
	Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers.			
	Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant.			
	Investigate the way in which water is transported within plants.			
	Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.			
	Animals including humans			
	Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat.			
	Identify that humans and some other animals have skeletons and muscles for support, protection and movement.			
	Rocks			
	Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties.			
	Describe in simple terms how fossils are formed when things that have lived are trapped within rock.			
	Recognise that soils are made from rocks and organic matter.			
	Light			
	Recognise that they need light in order to see things and that dark is the absence of light.			
	Understand that light is reflected from surfaces.			

	Recognise that light from the sun can be dangerous and that there are ways to protect their eyes.			
	Recognise that shadows are formed when the light from a light source is blocked by a solid object.			
	Find patterns in the way that the size of shadows change.			
	Forces and Magnets			
	Compare how things move on different surfaces.			
	Understand that some forces need contact between two objects, but magnetic forces can act at a distance.			
	Observe how magnets attract or repel each other and attract some materials and not others.			
	Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.			
	Describe magnets as having two poles.			
	Predict whether two magnets will attract or repel each other, depending on which poles are facing.
